

**CERTIFICATE FOR EXPORT OF POULTRY MEAT and POULTRY MEAT PRODUCTS TO THE REPUBLIC OF KOREA (ROK)**

EST./PLANT NO., NAME, AND ADDRESS OF SLAUGHTERHOUSE(S)	EST./PLANT NO., NAME, AND ADDRESS OF PROCESSING (Cutting/Boning) PLANT
EST. NO., NAME, AND ADDRESS OF COLD STORAGE	PACKING OR PROCESSING DATES <i>(Must include month, day and year. Date ranges are acceptable)</i>
PLACE WHERE CERTIFICATE WAS ISSUED <i>(City and State)</i>	SLAUGHTER DATES <i>(Must include month, day and year. Date ranges are acceptable)</i>

- The poultry meat and poultry products were derived from birds that were hatched and raised in the United States.
- There have been no outbreaks of highly pathogenic avian influenza in commercial poultry in the United States in the 12 months prior to export; however, in case the Korean Ministry of Agriculture, Forestry and Rural Affairs (MAFRA) recognizes that an effective stamping-out policy for highly pathogenic avian influenza is in place in the United States, the period can be shortened in accordance with the OIE regulations.
- There have been no outbreaks of Newcastle disease or low pathogenic avian influenza (as this disease is defined by the World Organization for Animal Health) within a 10 kilometer radius of the poultry farm(s) on which the source poultry were raised in the 3 months prior to slaughter.
- There have been no outbreaks of fowl cholera, fowl typhoid, pullorum disease, infectious bursal disease, Marek's disease, duck virus enteritis (for duck meat only) or duck viral hepatitis (for duck meat only) as recognized by the animal health authorities of the United States on the poultry farm (s) where the source poultry were raised in the 12 months prior to slaughter.
- The exporting establishment is not located within a disease control zone for any of the poultry diseases identified in statements 2-3 above.
- The poultry meat and poultry meat products eligible for export to Korea was not commingled with imported poultry meat or poultry meat products ineligible for export to Korea .
- The poultry meat and poultry meat products was derived from healthy birds subjected to ante-mortem and post-mortem inspection at the time of slaughter under the supervision of an official government veterinarian.
- The poultry meat and poultry meat products were handled in such a manner as to prevent contamination by communicable poultry disease pathogens.
- The product covered by this export certificate has been produced subject to the National Residue Program and meets FSIS maximum residue levels and microbiological standards which are equivalent to those of the Korean government. The poultry meat has not been treated with ionizing, ultraviolet rays, tenderizers, or other products likely to alter its nature or components.
- The packaging material used to wrap or pack the poultry meat and poultry meat products are safe for the intended use within the meaning of section 409 of the Federal Food, Drug and Cosmetic Act, as amended. (This is further described in Section 381.144 of the U.S. Mandatory Poultry Products Inspection Regulations.)
